**Please check the document version of this publication:**

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

## Erratum

Following publication of this article [1], it has come to our attention that some of the terminology used in the article could be difficult to interpret. In table 1, the description of the measurements should begin with t0. This would mean that t1 becomes t0, t2 becomes t1, and so forth. Furthermore, where schoolchildren are referred to in groups 1–8, groups 1 and 2 refer to Kindergarten children aged 4–6 years, and groups 3–8 correspond to children in Grades 1–6 aged 6–12 years. The correct abbreviation for 'The Healthy primary School of the Future' is HPSE.

## Author details
